

## CHATTANOOGA AREA WATER TRAILS

**DISCLAIMER:** When paddling, be prepared for high or low water issues, wildlife, possible portages, blockages and current (strainers), and other challenges. USGS river gauges are shown where available and can be used to check current conditions. Everyone is responsible for their own safety. Do not attempt a trip without the appropriate skills, equipment, and supplies. River miles are approximate and measured from the Mouth of the river (indicated for all waterways). Use River Miles data at various points along the same waterway to calculate approximate trip length for the planned paddle. Subtract the River Miles values to determine the length of a trip. Contact Eric Fleming, 598eric@gmail.com for suggested edits, copy of data, or additional information.

ID	Waterway	Name	City, State	GPS Coords	River Miles	Class I ?	Bathroom?	Camping?	Power Boats?	Details
